

Regarding Sinclair's broadcasting of yet another Kerry Vietnam testimony flap, I have read Kerry's testimony in 1971 several times. He betrayed no one. He reported what men who were witnesses or participants told him. This constant refighting of a war long past does nothing to solve the growing problems of today.

To air a biased mock-news program to defame one candidate without offering unrestricted equal time to the victim is yet another example of the biased nature of corporate media outlets and the constantly shrinking choice we Americans have.

I hope you will join me in defending my right to hear both sides of this particular story and to have an unbiased source of local news in the future.

Thank you,
